I am the technology instructor at Miller Middle School in Durango, CO.
We use digital learning in every subject.
My lab and the other labs and computer on wheels are constantly in use by students, implementing Common Core State Standards, online assessments, and IB curriculum.
The need for high speed network goes without saying. As a technology instructor, I see this need first hand. I urge the FCC to increase funding for the ERate program to help schools meet the demanding needs of students.

Thank you...
